AGING

30% is kept for 12 months in French oak barrels

ALCOHOL

14,3% by vol.

The grapes are harvested by hand, with scissors in plastic boxes of 10 kilos. Immediately after are carried to the winery. Once in the winery, on the selection table boxes are flushed and discarded those clusters and grains that are not in top condition for processing. The whole grapes, not crushed, enter to stainless steel tanks.

The utilization of techniques of "bleeding" added to a cold pre-fermentative maceration at a temperature of around 9°C, allowed us to achieve an exceptionally good aromatic and color extraction without raising atypically tannins. Thereafter for a period of between 8 to 10 days, are daily performed different types of delestages and pump-ups, regulating the fermentation by controlling the temperature. Once the alcoholic fermentation was completed, the skins are macerated in wine to obtain the desired color combination, tannins, and aromas. A malolactic fermentation takes place in this phase, maintaining the temperature above 20°C.

It was aged in French oak barrels, in our underground cave, for 12 months.

This blend stands out for its ruby-red color with garnet reflections and subtle dark hues. On the nose, it reveals aromas of ripe red fruits harmoniously intertwined with delicate spicy notes. On the palate, it is round and well-balanced, with integrated acidity and smooth, enveloping tannins — the result of the perfect harmony among the three grape varieties that compose it.

WINEMAKING NOTES

TO SERVE

Suggested drinking temperature: 15°C to 18°C.
